

Logimoni

Terms of Service & Privacy Policy

Effective date: July 3, 2026 | Contact and support: support@logimoni.com

DIGITAL SaaS

Universal HTTP Event Monitoring

This document summarizes the key terms and privacy practices for Logimoni, a digital SaaS product that helps users send and monitor custom application events through a universal HTTP POST API. By creating an account, using the dashboard, sending events, or purchasing a paid plan, you agree to these terms.

1. Service

Logimoni provides app event monitoring, project/category management, API event ingestion, dashboard usage views, and notification-related features. The service is provided as a digital SaaS product only; no physical goods are sold.

2. Accounts and Access

You are responsible for your account, API keys, project keys, and all activity performed through them. You must keep keys confidential and must not share them publicly. We may suspend or limit access where abuse, security risk, excessive load, or violation of these terms is detected.

3. Acceptable Use

You may not use Logimoni to send spam, malware, illegal content, abusive traffic, or intentionally harmful data. You must not send passwords, payment card numbers, identity numbers, health records, highly sensitive personal data, or secrets inside event messages.

4. Plans, Trial, Billing and Cancellation

Logimoni may offer a free trial and paid subscription plans. Paid plans renew according to the selected billing cycle unless cancelled. You may cancel future renewals from your account or by contacting support. Because users can evaluate the product during the free trial, Logimoni does not offer a separate voluntary refund policy after a paid subscription starts, except where required by applicable law or Paddle policies.

5. Payments

Payments, checkout, taxes, invoices, subscription billing, and payment-related processing may be handled by Paddle. Payment details are processed by Paddle and/or its payment partners. Logimoni stores subscription/payment status information needed to operate the service, but does not store full card numbers.

6. Data We Collect

We may collect and store account email address, password hash or authentication data, payment/subscription status, project information, category information, API usage data, event messages, IP address, user agent/browser information, timestamps, and support communications.

7. How We Use Data

We use data to provide the service, authenticate accounts, process subscriptions, display dashboards, receive and store events, send service emails, detect abuse, secure the platform, provide support, improve reliability, and comply with legal obligations.

8. User Event Data

Users control the content they send to Logimoni through projects, categories, and event messages. You are responsible for ensuring that event data is lawful and appropriate. If your application sends end-user data to Logimoni, you are responsible for having the necessary rights, notices, and consents.

9. Data Deletion

Data can be deleted upon request by contacting support@logimoni.com. Account, project, and event data may be removed after verification of the request. Some limited records may be retained where required for security, fraud prevention, dispute handling, billing, tax, or legal compliance.

10. Availability, Changes and Contact

We aim to keep Logimoni reliable, but the service is provided without a guarantee of uninterrupted availability. Features, limits, and pricing may change over time. We may update this document when needed. For privacy requests, support, cancellation help, or account/data deletion requests, contact support@logimoni.com.
